

Underwriting

DESIGNED FOR UNDERWRITING EXCELLENCE

Delivered through a centralized platform, 'Underwriting' systemizes an underwriter's knowledge and delivers analytics-driven insights throughout the decision-making process. Consolidating all underwriting functions into a single application, 'Underwriting' integrates into established core policy administration systems, driving significant benefits in operational efficiency and data accuracy that massively increases the velocity and agility of decision making. Powered by an ecosystem of data providers that supports data led decisions, 'Underwriting' proactively delivers new business insights and risk specific knowledge. Combined with an underwriter's own intellectual property, underwriters can create new products, understand risk at new levels of granularity and differentiate beyond their peers.

**UNDERWRITING - FOR UNDERWRITERS TO LEAD AND EXCEL
IN THE DIGITAL ERA**

Revolutionizing
Insurance Software

Advantage ™

THE PERFECT PRODUCT FOR UNDERWRITERS

'Underwriting' delivers powerful insights to underwriting decision makers, enabling you to drive excellence and discipline throughout the underwriting process.

FEATURES:

- ▶ A single platform for insurance product management utilizing integration, orchestration, workflow, standard business processes, and rules engine.
- ▶ An open integration architecture that allows seamless connectivity to internal and external third-party market systems such as PPL, Whitespace, broker systems and other software houses.
- ▶ Real-time pushed intelligent notifications combined with analytics to proactively drive informed and timely decisions.
- ▶ Embedded analytics proactively delivered through the system, and access to new data sources via AdvantageGo's microservice platform.
- ▶ Rapid new deployment capability, simplified process and change management coupled with an extensible database.
- ▶ AdvantageGo's digital marketplace integrates with the solution to deliver functional microservices and curated, relevant third-party data.
